MVC APPLICATION

Learned about the GitHub operation and got used to it I.e. Pull Push & synching via visual studio

Made progress on GitHub Repo readme, issue, pull request, contribution template and wiki

Members uploaded the diagrams and executed effective methods for improving web app structure.

Presentation.

Developer showed a preview of the web and received suggestion with analysist

Week 19	Week 20	Week 21	Week 22	Week 23	Week 24	Week 25	Week 26-28	Week 29	Week 30

Learned about delineation with MVC project in visual studio.

Added coursework on the wiki for detailed explanation. Modified individual wikis and team planned on diagram.

Improved team wiki for crystal clear understanding and made fixes

Continued to develop the web under assistance of analysist.

Updated everything from Readme to issues etc and final submission.
